

CAPABILITY STATEMENT

DCE, Inc. is a certified Small Business founded in 2011 providing specialized engineering support and custom electronic products to the performance automotive, aviation, military, marine and motorsports markets.

DCE, Inc. specializes in:

- Specialized Engineering Support
- Production of Complex, High Quality, Lightweight, Durable wiring harnesses
- Whole system electronic design and development to include reverse engineering.
- Prototype harness design, development, and manufacturing.
- Short lead time production processes
- Seamless integration as sub-contractor to Prime contractors.
- Production of Electric Power Assisted Steering (EPAS) for conventional or autonomous use.

TECHNICAL PARTNERS

PRIMARY NAICS CODES

334419	<i>Other Electronic Component Manufacturing – Wiring Harnesses</i>
336320	<i>Motor Vehicle Electrical and Electronic Equipment Manufacturing</i>
336413	<i>Other Aircraft Parts and Auxiliary Equipment Manufacturing</i>
541715	<i>Research and Development in the Physical, Engineering and Life Sciences (except Nanotechnology and Biotechnology)</i>

PAST PERFORMANCE

Acted as force multiplier for Wayne Taylor Racing DPI Cadillac team during 2017 24 Hour of Daytona Race. Provided on-track Engineering support in Team Engineers absence. WTR won this prestigious event.
Selected as one of two certified harness suppliers for Bosch North America. Recognized as harness builder of choice for NASCAR engine builders, Ford Performance engine program and all Cadillac Racing.
Provided whole electronic system design, development and production services to Hoonigan Racing for their acclaimed Hoonitruck program. Also provide this service to DME Racing Championship Pro Street Motorcycle race team and countless other programs in all forms of racing.
Worked with Electric Vehicle manufacture to provide prototype vehicle harnesses during concept and validation phases. Reduced anticipated development time from 6 months to 6 weeks. Reduced development budget in excess of \$140,000. Provided engineering and production services to electric vehicle battery manufacturer for high current battery cables. Our ability to understand and develop solutions for complex design requirements resulted in rapid production of quality cables 3 months ahead of schedule and \$25,000 under budget.
Our understanding of Motorsports Rapid Requirements transfers to other industry thus saving time and money.
